UNIKNAME

The Multipurpose Self-Sovereign Identity (SSI) Platform
without KYC

Light Deck

update sept. 20th, 2021

The Internet is going through a **digital identity crisis**. The absence of a built-in identity layer is causing **security and interoperability issues**. Furthermore, the centralization of identity solutions in the ends of the US-based GAFAM is creating **sovereignty and dependency issues** for countries, users, and service providers alike. The rise of **self-sovereign identities** is an answer to this predicament.

UNIKNAME

The Multipurpose Self-Sovereign Identity solution for any web platforms and web applications

Unikname's goal is to **empower web solutions** with **Decentralized ID** capabilities by leveraging blockchain innovation.

Unikname is a multipurpose and **no-KYC Self-Sovereign Identity** (SSI) platform relying on a specialized blockchain with an up and running livenet.

The platform combines ready-to-use decentralized identity products and an integration framework.

Unikname is a Modular SSI platform

Unikname enhances added value of companies with blockchain innovation and the use of decentralized Identity.

Decentralized Identity enables new features to the services offered by companies: It has the power of enhancing **customer loyalty**, providing **trust** and **privacy to users** and reinforcing **cybersecurity at lower cost**.

Decentralized Authentication
New generation and single step strong authentication without email or password

Privacy-friendly Data Sharing
A module to setup private digital identity concept and its toolkit

Data Certification
A module to certify documents and operations without KYC (a.k.a Know Your Customer)

Rewarding System
Improve user experience with our rewarding system based on a fidelity program and a digital token

Digital Identity Management
Toolkit to manage web access or control remote identifiers (e.g IoT)
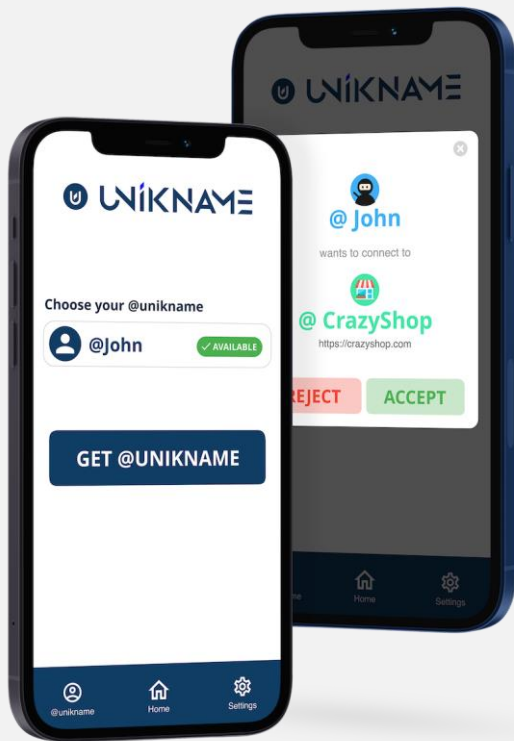

Anonymous Voting
Setup surveys or votes respecting participant's privacy and anonymity with Unikname tools

Our 1st Killing module is up and running

📱 **Decentralized Authentication**
New generation and single step strong authentication without email or password

Unikname Connect is the first SSI module implemented by the Unikname Team.

This decentralized authentication solution can both be used with customers or within an organization, as a means of unifying heterogenous login interfaces.

It lets users login with their UniknameID, with a high level of **simplicity, privacy, and security**.
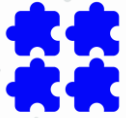

This is the door for using any other SSI services.

SSI Market revenue to grow almost 1000% over the next 4 years

Unikname aims to revolutionize the web access market and sits in the SSI emerging market that will be worth more than $1 billion by 2024. This dynamic and not yet structured market is a strategic challenge for companies and for states as it concerns the **protection of the new black gold of the 21st century: DATA!**

Unikname is... unique!*

Plug & Play Modules

Unikname is a **business oriented platform** composed of ready-to-use products and an integration framework.

Token Business Model

The $UNIK token can be used by companies willing to implement SSI features with restricted access or for rewarding and loyalty programs.

No-KYC SSI

Accessing the web without proving its verified identity is what everyone does every day. **Users get their own pseudonymous ID in seconds**, without KYC.

Multilingual Naming System

UnikNameIDs are human-readable named IDs based on NFT and DID, protected against spoofing, represented with Latin characters but also with other alphabets.

(*Patented Technology*)
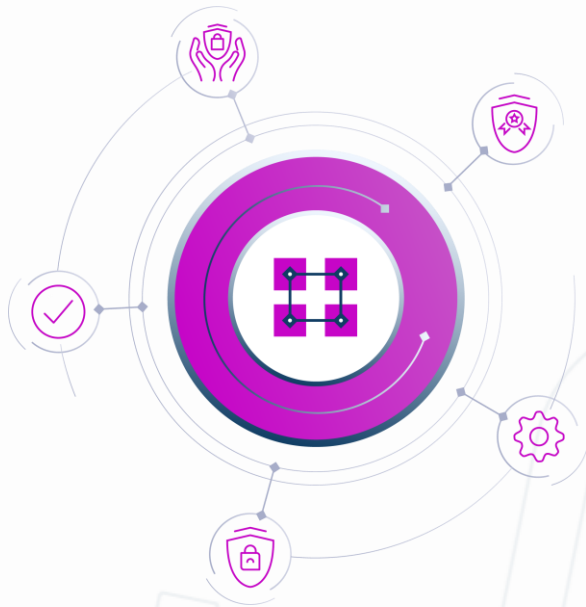

* Key Differentiating Factors

UNIK NAME NETWORK

and the Unikname Token

UNIKNAME
NETWORK

Unikname Platform runs with its own blockchain, **unikname.network,** using the famous ARK.IO framework.

unikname.network **provides SSI* services** relying on DID and NFTs with an international naming system.
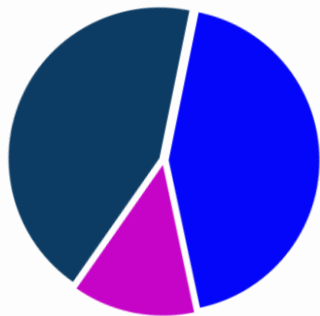

The Livenet has been live for over a year.

* Self-Sovereign Identity

9

Unikname.network is a DPOS public blockchain

Secured by 23 delegates

To increase decentralization and improve network stability, delegate seats are split into 3 colleges.

10
Individuals
Defenders of individual freedom and privacy

3
Network Players
Community members acting for network prosperity

10
Organizations
Committed in securing the web for businesses

The $UNIK token is the fuel of unikname.network.
It's required to enable SSI operations and to access SSI services.

for trading purpose on DEx

The Unikname project is managed by the Space Elephant SAS French company, incorporated in April 2018 with 4 founders and €75k.

Our vision:
**Making the internet trustful and safer.**

Our mission:
Being a key provider of Decentralized Identifier Solutions.

The company has been funded with €730k in Private Equity with a Seed Round.

Thanks to some early French Partners who trusted us…

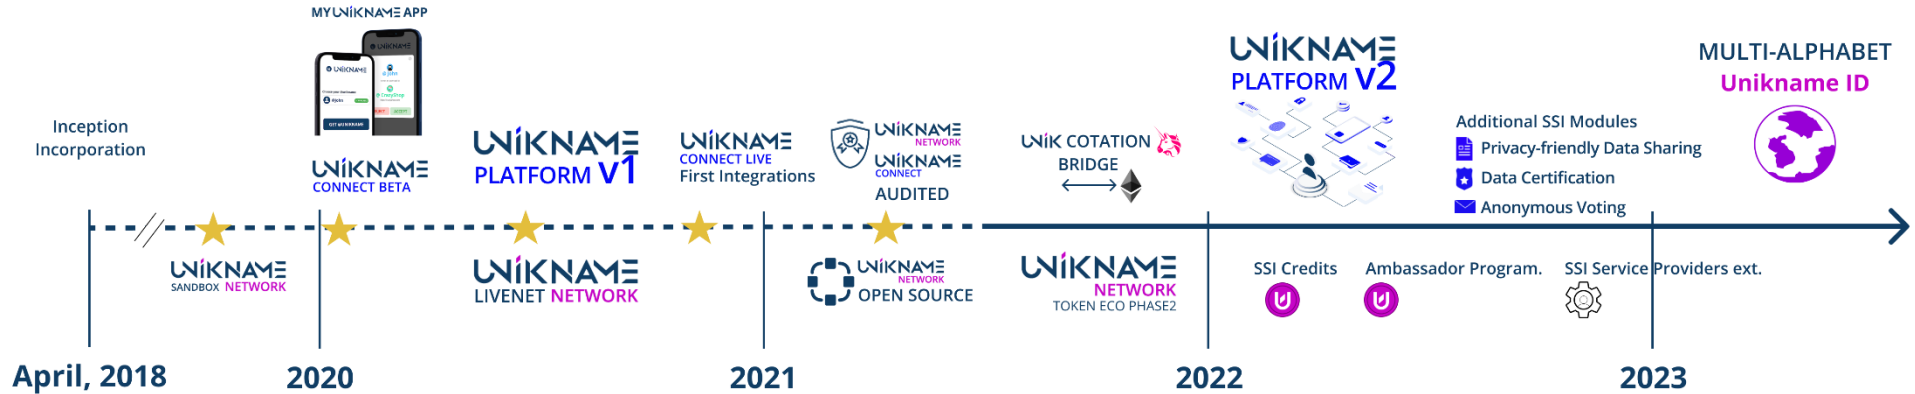

…and to our strategic private investors

Unikname Roadmap

Fully Committed Team to Deliver
